The Handbook offers models of teaching and learning that go beyond the typical lecture-laboratory format and provides rationales for new practices in the college classroom. It is ideal for graduate teaching assistants, senior faculty and graduate coordinators, and mid-career professors in search of reinvigoration.

The purpose of this study is to examine the content of the questions in a number of Advanced Placement Examinations and to attempt to identify content that is related to gender-based performance differences. Free-response questions for ten forms of the AP? Exams in U.S. History, European History, Biology, Microeconomics, and Macroeconomics were studied and the multiple-choice items for four forms of AP U.S. History were also studied. Results indicate that, in the case of U.S. History multiple-choice items, the measures of male and female performance differences are significantly correlated with item content. In a second analysis, the findings for nine of these content categories were replicated in different forms of the exam, suggesting that these results are of generalizable interest. In the case of the free-response questions for each of the five subject areas, the study identified a significant relationship between item content and gender-based performance differences, but there were not enough items for a

Read PDF 2002 Ap Biology Multiple Choice Answers

replication study. Overall, this study suggests that item content is associated with gender-based performance differences. The following are appended: (1) Content Categories for U.S. History Multiple-Choice Items; (2) Content Categories for U.S. History Free-Response Questions; (3) Content Categories for European History Free-Response Questions; (4) Content Categories for Biology Free-Response Questions; (5) Content Categories for Microeconomics Free-Response Questions; and (6) Content Categories for Macroeconomics Free-Response Questions.

This book takes a fresh look at programs for advanced studies for high school students in the United States, with a particular focus on the Advanced Placement and the International Baccalaureate programs, and asks how advanced studies can be significantly improved in general. It also examines two of the core issues surrounding these programs: they can have a profound impact on other components of the education system and participation in the programs has become key to admission at selective institutions of higher education. By looking at what could enhance the quality of high school advanced study programs as well as what precedes and comes after these programs, this report provides teachers, parents, curriculum developers, administrators, college science and mathematics faculty, and the educational research community with a detailed assessment that can be used to guide change within advanced study programs.
