My Amazon review: Books on multiple personality disorder are not, as a rule, very well written and A Fractured Mind is no exception to this. It is unfortunate, however, that where those other books made up for literary lapses by being incredibly emotional, open, and intriguing, A Fractured Mind falls more than short.

In 1989, Robert B. Oxnam, the successful China scholar and president of the Asia Society, faced up to what he thought was his biggest personal challenge: alcoholism. But this dependency masked a problem far more serious: Multiple Personality Disorder. At the peak of his professional career, after having led the Asia Society for nearly a decade, Oxnam was haunted by periodic blackouts and episodic rages. After his family and friends intervened, Oxnam received help from a psychiatrist, Dr. Jeffrey Smith, and entered a rehab center. It wasn't until 1990 during a session with Dr. Smith that the first of Oxnam's eleven alternate personalities--an angry young boy named Tommy--suddenly emerged. With Dr. Smith's help, Oxnam began the exhausting and fascinating process of uncovering his many personalities and the childhood trauma that caused his condition. This is the powerful and moving story of one person's struggle with this terrifying illness. The book includes an epilogue by Dr. Smith in which he describes Robert's case, the treatment, and the nature of multiple personality disorder. Robert's courage in facing his situation and overcoming his painful past makes for a dramatic and inspiring book.

We all have many sides to our personalities, which we display to different friends, colleagues and partners, but what happens if those facets become detached from each other, and take on lives of their own? This is what Bob Oxnam was to discover when he was diagnosed with multiple personality disorder. The first of Bob's personalities to make himself known during therapy was an angry young boy named Tommy, who claimed to live in a castle in Bob's mind. Bob's psychiatrist eventually met all 12 'people' who lived in the castle. He uncovered why Tommy was torturing Bobby in the dungeon, and the many other layers of terror that had lived in Bob since he was a small child. Told in the voices of the different personas, we see the bookish Robert take over as dominant personality from Bob, and watch as the other personalities successfully merge into the three that share power today.

Fractured Minds introduces the reader to clinical neuropsychology through vivid case descriptions of adults who have suffered brain damage. At one level, this is a book about the courage, humor, and determination to triumph over illness and disability that many "ordinary people" demonstrate when coping with the extraordinary stress of a brain disorder. On another level, it is a well-referenced and up-to-date textbook that provides a holistic view of the practice of clinical neuropsychology. Included are reader-friendly descriptions and explanations of a wide range of neurological disorders and neuroscientific concepts. Two introductory chapters are followed by 17 chapters that each focus on a specific disorder and include research, clinical assessment, rehabilitation, and a detailed case study. Disorders range across the full spectrum from common ones such as traumatic brain injury and dementia, to rare disorders such as autotopagnosia. Each of the 16 chapters retained from the first edition has been revised to reflect current research and clinical advances. Three new chapters on multiple sclerosis, Parkinson's disease, and Huntington's disease incorporate

discussion of important current topics such as genetically-transmitted diseases, genetic counseling, gene transplantation, functional neurosurgery, and the complex ethical issues that go hand-in-hand with these new techniques. This informative and engaging book will be of interest to students of clinical psychology, neuropsychology, and neurology, health professionals who work with neurological patients, neurological patients and their families, and lay readers who are simply fascinated by the mind and brain.

Do you sometimes feel you have to check your intellect at the church door, leaving reason behind to embrace the Christian faith? Do you hunger for a “ full gospel ” that includes the mind as well as heart and Spirit? Full Gospel, Fractured Minds? challenges charismatic and Pentecostal believers to discover the power of a well-maintained mind—a mind on fire—to match a heart on fire and to create a life that operates within the full counsel of God . Na ñ ez shows how human reason helps us understand and interpret God ’ s Word as well as defend the gospel. He shows what the Bible teaches about the mind, and explores the backgrounds of nineteenth-century and modern culture, anti-intellectualism, Pentecostal history and beliefs, and popular misconceptions about human intellect in relation to the Christian faith. Full Gospel, Fractured Minds? helps men and women practice a Christian faith that reflects the whole person and the full gospel. “ Rick Na ñ ez calls Pentecostals and charismatics to seek a balance between mind and Spirit. This book will stir you to seek all that God has for you. ” —From the Foreword by Stanley M. Horton, PhD

Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara ' s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she ' d traveled too far, if there was still a way home. “ Beautiful and propulsive . . . Despite the singularity of [Westover ' s] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up? ” —Vogue

Winner of the 2016 eLit Awards: Silver in Psychology/Mental Health. Fractured Mind: The Healing of a Person with Dissociative Identity Disorder chronicles the healing process of a person suffering from DID. The disorder happened due to a long sustained period of traumatic violence during childhood. The book depicts the working of the subconscious and how it reveals itself layer upon layer from the surface of the

subconscious to its depth. With hope and the support of amazing people, and at times the teaching and intervention of God, angels, and the Holy Spirit, a reformation of the psyche takes place. This book is a witness of the living Christ. The story tells of a journey of healing. Warning: this book is for adults only due to explanations of sexual and physical violence causing dissociation at an early age. Helped by intensive psychological therapy, Debra's subconscious peels away layer by layer, revealing horrific trauma caused by her parents at a very young age. Due to the trauma, Debra has been unable to overcome serious fears and beliefs about herself and her world. Her damage was so severe, the foundation of her psyche had to be remade. Because of the nature of DID having been formed during the violence, she has been "stuck in the trauma" and unable to process and change without professional help. But process she did through a great deal of emotional pain and physical discomfort. "Fractured Mind: The Healing of a Person with Dissociative Identity Disorder" also describes an unusually close relationship with God and what Debra calls the "Other Realm." The story witnesses the love and comfort of God, but it also tells of God's wisdom and justice. Debra brings her relationship with her God to life in the book and that relationship seems as real as any relationship with a loving, guiding, parent. Debra writes a narrative throughout the book, but the main writing style is an email dialogue between her, her "parts," and Bruce. Bruce's wisdom and spiritual understanding lend an amazing perspective on the struggles of healing from violence. Bruce's writing is a testimony of unconditional love, kindness, and dedication to the health of a person. He exemplifies a true friend. Dissociative Identity Disorder is not a mental illness, but a disorder. Because her mind fractured, she has been able to live in society very successfully. Many people with DID are successful professionals, and Debra is no exception. But the healing has released her of her trauma. She is no longer bound by trauma. This printed edition is a shorter version than the ebook.

I want to be the person they need me to be. I need it. But I'm afraid...that I'm crazy.

As seen in USA Today's hottest releases and The Washington Post's 10 New Books Spotlight “ Sarah Wilson is a force of nature — quite literally. She has taken her pain and grief about our sick and troubled world and alchemized it into action, advocacy, adventure, poetry, and true love. ” — ELIZABETH GILBERT Wake up and reclaim your one wild and precious life. New York Times bestselling author Sarah Wilson shows you how in this radical spiritual guidebook, the book we need NOW. Many of us are living with the sense that things are not right with the world and are in a state of spiritual PTSD. We have retreated, morally and psychologically; we are experiencing a crisis of disconnection—from one another, from our true values, from joy, and from life as we feel we are meant to be living it. Sarah Wilson argues that this sense of despair and disconnection is ironically what unites us—that deep down, we are all feeling that same itch for a new way of living. Drawing on science, literature, philosophy and the wisdom of some of the world ’ s leading experts, and her personal journey, Wilson offers a hopeful path forward to the life we love. En route, she shows us how to wake up and reconnect with life using “ wild practices ” that include:

- Hike. Embrace the “ walking cure ” as great minds throughout history have.
- Go to your edge. Do what scares you and embrace discomfort daily.
- #Buylesslivemore. Break the cycle of mindless consumption and get light with your life.
- Become a soul nerd. Light up your intellect with the arts.
- Get “ full-fat spiritual ” . Have an active practice and use it to change the world.
- Practice wild activism. Through sustained, non-violent

protest we can create our better world. The time has come to boldly, wildly imagine better. We are being called upon, individually and as a society, to forge a new path and to find a new way of living. Will you join the journey?
