What's it like to have ADHD? - YouTube

Attention deficit hyperactivity disorder (ADHD) is a brain disorder that affects how you pay attention, sit still, and control your behavior. It happens in children and teens and can continue into...

ADHD: Symptoms, Types, Testing, and Treatment

Attention deficit hyperactivity disorder (ADHD) is a condition that affects people's behaviour. People with ADHD can seem restless, may have trouble concentrating and may act on impulse. Symptoms of ADHD tend to be noticed at an early age and may become more noticeable when a child's circumstances change, such as when they start school.

Attention deficit hyperactivity disorder (ADHD) - NHS

Without ADHD (or any mental disorder, for that matter), you're standing on the stage juggling. With adult ADHD, you're on the unicycle. Not only are you trying to juggle, but you also don't have a firm surface under your feet. It takes LOTS more concentration just to keep juggling because you've got the mental overhead of staying upright.

Heres Exactly How To Know What ADHD Feels Like

ADHD is a condition where you have lots of energy and have difficulty concentrating. You might also find it hard to control what you say and do. For example, you might speak without thinking first, or find that you do things on impulse. Symptoms usually start very early in life, before the age of six.

ADHD - YoungMinds

The symptoms of attention deficit hyperactivity disorder (ADHD) can be categorised into 2 types of behavioural problems: inattentiveness, and hyperactivity and impulsiveness. Most people with ADHD have problems that fall into both these categories, but this is not always the case. For example, some people with the condition may have problems with inattentiveness, but not with hyperactivity or impulsiveness.

Attention deficit hyperactivity disorder (ADHD) - Symptoms ...
