Online BLS Handbook

The 2015 guideline now defines the target depth for adult compressions to be between 2-2.4 inches (5-6 centimeters). Research reviewed by the ILCOR revealed that compressions delivered beyond this depth may result in an increased risk of resuscitation related injuries, such as rib fractures, which is what led to this change in 2015 guidelines.

2015 - 2020 BLS Guideline Changes

The guidelines contain detailed information about basic and advanced life support for adults, paediatrics and newborns, as well as information on the use of Automated External Defibrillators and other topics.
