Semester  
Introduction to Neuro-computing  
Chapter 2: Training the Neural networks  
Chapter 3: The unsupervised networks  
Chapter 4: The fuzzy logic  
Chapter 5: The Evolutionary computation  
Chapter 6: Few Auxiliary algorithms

This book is of immense use for the students of B.Tech (CSE), B.Tech (IT), BCA, DCA and PGDCA who involved in this field. This book is divided into five chapters and all topics are illustrated with clear diagrams, very simple language is used throughout

Semester  
are ripe for the picking. There are now more sources of data than ever before, and more means of capturing data. At the same time, the sheer volume and complexity of the data have sparked new developments, where many Big Data problems require new solutions. Given its scope, the book offers a valuable reference guide for all graduate students, researchers, and scientists interested in exploring the potential of Big Data applications.

Risk detection and cyber security play a vital role in the use and success of contemporary computing. By
