As the number, size, and complexity of patent cases have grown throughout the United States over the past several decades -- paralleling expansion in the role of high technology enterprises in the U.S. economy -- the need for a comprehensive, user-friendly, and practical judicial guide for managing patent cases has become increasingly apparent. Recognizing this, the authors surveyed the range of approaches and perspectives on patent case management, fostered discussion and analysis of patent case management techniques, and developed this authoritative guide for judges, law clerks, practitioners, and patent and civil procedure professors and scholars. The Patent Case Management Judicial Guide is a collaborative effort between the Federal Judicial Center and the Berkeley Center for Law & Technology of the University of California - Berkeley School of Law.
