The Global Casino is an introduction to environmental issues which deals both with the workings of the physical environment and with the political, economic and social frameworks in which the issues occur. Using examples from all over the world, the book highlights the underlying causes behind environmental problems, the human actions which have made them issues, and the hopes for solutions. It is a book about the human impact on the environment and the ways in which the natural environment impacts human society. The sixth edition has been fully revised and updated throughout, with new case studies, figures, and online resources including a complete lecture course for tutors and multiple-choice questions for students. New concepts and topics covered for the first time in this edition include the green economy, the forest transition model, marine microplastic pollution, urban disasters, decommissioning of big dams, and the start of the Anthropocene. Recent international initiatives covered include the Paris Agreement on climate change, the Aichi Biodiversity Targets, and the Sendai Framework for managing disaster risk. New case studies include Morocco's Noor concentrated solar power plant, desert recovery in Kuwait, and river management on the Huang Ho. Eighteen chapters on key issues follow three initial chapters which outline the background contexts of the physical and human environments and the concept of sustainable development. Each chapter provides historical context for key issues, outlines why they have arisen, and highlights areas of controversy and uncertainty to appraise how issues can be resolved both technically and in political and economic frameworks. Each chapter also contains an updated critical guide to further reading - many of them open access - and websites, as well as discussion points and essay questions. The text can be read in its entirety or individual chapters adopted as standalone reading. This book is an essential resource for students of the environment, geography, earth sciences and development studies. It provides comprehensive and inspirational coverage of all the major global environmental issues of the day in a style that is clear and critical.

The authors maintain that regions are the outcomes of a set of twin forces of globalization and regionalization.

Therefore, each regional chapter stresses the global systems of connection that drive unique regional processes, making regions different. By studying regions, students not only learn the critical elements of different places, but also come to understand the fundamental processes that drive change. The Fifth Edition discusses geographies of emerging regions, incorporates cutting-edge data visualizations and infographics, including Quick Response codes linking to online media, features a completely modernized cartography program, and much more.

Players learn the different bets available, winning strategies for betting with and against the dice, how to maximize wins at hot tables, and how to make bets which give the house no edge at all! Includes money management, glossary. 64 pages

Originally opened in May 1955, the Moulin Rouge Hotel and Casino quickly rose in popularity as Las Vegas' first racially-integrated hotel and casino. Sammy Davis, Jr., Louis Armstrong, and other A-list black singers and musicians performed at the Moulin Rouge on a regular basis, and for once they were allowed to spend the night in the same hotel where they performed. This book explains the important role

that the hotel-casino played in early desegregation efforts in Las Vegas. With the Moulin Rouge as the backdrop, it provides an analysis of the evolution of race-relations in Las Vegas, including a detailed account of the landmark 1960 desegregation agreement. Finally, it examines recent efforts to rebuild and renovate the historic establishment.
