Australian Export: A Guide to Law and Practice remains an ideal introduction and guide to the legal requirements and processes that affect international transactions, and their commercial implications. As global trade and overseas markets become increasingly important for Australian business, the need for a concise and accessible overview of relevant laws and procedures has never been greater. Australian Export meets this need with an emphasis on real-world considerations and practical solutions, underpinned by expert commentary on the law. This new edition has been thoroughly updated to reflect recent legal developments in Australia and internationally, and the coverage of many topics has been expanded. New examples and case studies have been added, and each chapter now includes key concepts and further reading to reinforce learning.

There is an urgent need to develop and improve low cost technologies for wastewater treatment. Simultaneously treating wastewater and producing duckweed in a pond system is, therefore, an attractive solution contributing to

both environmental protection and food production. Duckweed has excellent qualities: a high protein content, a high growth rate and is an easy crop to handle. The small plant turns nitrogen from wastewater into a food source. This thesis reports on the effect of different operational variables, like anaerobic pre-treatment, the combination of algae and duckweed ponds and pond depth. Improved nitrogen removal was obtained through the combination of duckweed ponds with algae ponds. Duckweed pond systems could be designed with shallow depth without affecting nitrogen removal efficiency. This research is the result of the cooperative effort between the EIDENAR, Univalle, Cali, Colombia and the UNESCO-IHE Institute for Water Education in Delft, the Netherlands.

This book represents the first consolidated history of vocational education and training in the Northern Territory. Not only does the story present a chronological account of events, people and institutions, it also offers an explanation of how the system actually works and this has application well beyond the Territory. The mix of historical accounting and operational analysis comes from a unique perspective. It is proposed that the best way to understand the behaviour of the government ministers who have responsibility for vocational training is to compare their decisions and actions with those of wealthy philanthropists.

The CQ Press Guide to Urban Politics and Policy in the United States will bring the CQ Press reference guide approach to topics in urban politics and policy in the United States. If the old adage that "all politics is local" is even partially true, then cities are important centers for political activity and for the delivery of public goods and services. U.S. cities are diverse in terms of their political and economic development, demographic makeup, governance structures, and public policies. Yet there are some durable patterns across American cities, too. Despite differences in governance and/or geographic size, most cities face similar challenges in the management of public finances, the administration of public safety, and education. And all U.S. cities have a similar legal status within the federal system. This reference guide will help students understand how American cities (from old to new) have developed over time (Part I), how the various city governance structures allocate power across city officials and agencies (Part II), how civic and social forces interact with the organs of city government and organize to win control over these organs and/or their policy outputs (Part III), and what patterns of public goods and services cities produce for their residents (Part IV). The thematic and narrative structure allows students to dip into a topic in urban politics for deeper historical and comparative context than would be possible in either an A-to-Z encyclopedia entry or in an urban studies course text. FEATURES: Approximately 40 chapters organized in major thematic parts in one volume available in both print and electronic formats. Front matter includes an Introduction by the Editors along with biographical backgrounds about the Editors and the Contributing Authors. Back matter includes a compilation of relevant topical data or tabular presentation of major historical developments (population growth; size of city budgets; etc.) or historical figures (e.g., mayors), a bibliographic essay, and a detailed index. Sidebars are provided throughout, and chapters conclude with References & Further Readings and Cross References to related chapters (as links in the e-version). This Guide is a valuable reference on the topics in urban politics and policy in the United States. The thematic and narrative structure allows researchers to dip into a topic in urban politics for a deeper historical and comparative context than would be possible in either an A-to-Z encyclopedia entry or in an urban studies course text.

Providing for the first time, a comprehensive and scholarly account of the normative framework involved in the area of collective international peace and security, Documents on the Law of Peace Operations moves beyond the study of traditional UN peacekeeping missions to examine missions initiated by regional organizations and by coalitions of states, as well as missions with a hybrid nature. The book provides key documents, accompanied with commentary, which identify and explain the legal framework or applicable legal norms involved in the planning, management and conduct of international peace operations. Topics covered include obligations under international humanitarian law, human rights law, international criminal law, and privileges and immunities. Special attention is also paid to matters such as accountability, the rule of law, and the protection of civilians. Appealing to scholars, policy makers, as well as representatives in the military, police and humanitarian organisations, this book will be an invaluable resource to develop better understandings of the legal norms relevant to a broad range of peace operations.
