Hempel / Blakes 500ml Prop Primer - Stone Grey. Ref18: HP-101EX M56 An anti-corrosive primer and tie coat for different substrates. Recommended for use as primer for antifouling on propellers and outboard engines on yachts. Fast drying, good adhesion to steel and other metals, re-coatable with the most common types of paint.

Introduction -- Basics of Hydroblasting -- Hydroblasting equipment -- Steel Surface Preparation by Hydroblasting -- Surface Quality Aspects -- Hydroblasting Standards -- Alternative Developments in Hydroblasting -- References -- Appendix.

Engineers on major building projects continue to echo the sentiment that "painting amounts to 10% of the job, but provides 90% of the problems". This second edition of Steelwork Corrosion Control provides sound advice and authoritative guidance on the principles involved and methods of achieving sound steel protection. Taking into account the considerable developments in the paint protection industry, Steelwork Corrosion Control has been comprehensively updated to include new materials and coating systems, and the number of new ISO / BS / European standards and codes of practice on paints and painting, health and safety, and environmental issues. It is a must-have guide for engineers, architects and designers for whom the protection of structural steelwork is an important, albeit relatively minor, part of their professional activities. David Deacon is the President Elect of the Institute of Corrosion and a Fellow of FTCS (Fellowship of Technical Service Coating). Derek Bayliss is a Past President of the Institute of Corrosion and has served as Chairman of BS 5493 (concerned with coating structures against corrosion).
