An essential masterwork from Chinese literary giant Lu Yao--winner of the Mao Dun Literature Prize--available for the

first time in English. Lu Yao published only two novels before his untimely death--but their extraordinary influence catapulted the author to the top tier of Chinese contemporary fiction, establishing him as one of the most widely read and respected figures in Chinese literature. In this first-ever translation of Lu Yao's *Life*, we meet Gao Jialin, a stubborn, idealistic, and ambitious young man from a small country village whose life is upended when corrupt local politics cost him his beloved job as a schoolteacher, prompting him to reject rural life and try to make it in the big city. Against the vivid, gritty backdrop of 1980s China, Lu Yao traces the proud and passionate Gao Jialin's difficult path to professional, romantic, and personal fulfillment--or at least hard-won acceptance. With the emotional acuity and narrative mastery

that secured his reputation as one of China's great novelists, Lu Yao paints a vivid, emotional, and unsparing portrait of contemporary Chinese life, seen through the eyes of a working-class man who refuses to be broken.

Machines aren't supposed to feel, but this cyborg can't help falling in love. Assigned as a specimen collector for a captured cyborg, Chloe is intrigued by the machine disguised as a man. Kidnapped during his daring escape, he shows her that despite the chip in his brain, his humanity is not completely lost. Formerly known as unit X109GI, Joe is on a quest to discover his origin. While he doesn't find the answers he's looking for, he does discover that affection and lust aren't just for humans. But when it comes to a battle between logic and

love, which side will the cybernetic organism—once a man—choose?Evaluating his feelings will have to wait though because the military isn't done with Joe. But their threats against him pale in comparison before the shocking discovery of project C791, the revelation of which stuns the rebel cyborgs—and ignites a fury for vengeance.

"A pleasingly original contribution to the paranormal-romance genre." —Kirkus Reviews A simple but forgotten truth: Where harbingers of death appear, the morgues will soon be full. Angie Dovage can tell there's more to Reece Fernandez than just the tall, brooding athlete who has her classmates swooning, but she can't imagine his presence signals a tragedy that will devastate her small town. When something

supernatural tries to attack her, Angie is thrown into a battle between good and evil she never saw coming. Right in the center of it is Reece—and he's not human. What's more, she knows something most don't. That the secrets her town holds could kill them all. But that's only half as dangerous as falling in love with a harbinger of death. Each book in the Black Bird of the Gallows series is **STANDALONE**: * Cleaner of Bones (Prequel) * Black Bird of the Gallows * Keeper of the Bees

This text emphasizes a modern approach to microeconomics by integrating new topics in microeconomic theory and making them accessible to students. These topics include risk

and uncertainty, asymmetric information and game theory. Traditional topics are also treated in a clear way with solid applications. Modifications have been made to the text in this edition, these include new information on the theory of the firm, specifically the coverage of cost, and examples are included throughout the text to reinforce the material presented.

This book highlights the sustainability aspects of additive manufacturing (AM) in two separate volumes. It describes the details of this technology and its implications on the entire product life cycle sustainability, as well as embedded carbon

and the further research needed to move this technology towards sustainable, mainstream production. Sustainability is not new for any area of industry, including additive manufacturing, and there are currently a number of ongoing research projects, both in industry and in academic institutions, that are investigating sustainability, embedded carbon and research activities which would need to be done in the future to move this technology towards sustainable mainstream production.

Imprisoned for life aboard a zeppelin that floats high above a fantastic metropolis, greeting-card writer Harold Winslow pens his memoirs. His only companions are the disembodied voice of Miranda Taligent, the only woman he has ever loved,

and the cryogenically frozen body of her father, Prospero, the genius and industrial magnate who drove her insane. As Harold heads toward a last desperate confrontation with Prospero to save Miranda's life, he finds himself an unwitting participant in the creation of the greatest invention of them all: the perpetual motion machine. Beautifully written, stunningly imagined, and wickedly funny, Dexter Palmer's *The Dream of Perpetual Motion* is a heartfelt meditation on the place of love in a world dominated by technology.
