Instrument Trade Theory N2 Past Question Papers

N2 Electrical Trade Theory Exam Papers 2014 is one of the most referred reading material for any levels. When you really want to seek for the new inspiring book to read and you don't have any ideas at all, this following book can be taken. This is not complicated book, no complicated words to read, and any complicated theme and topics to ...

30 Past Solved Papers (2018-07) for SSC junior engineer Exam General Awareness is a comprehensive book prepared using authentic papers of the SSC exam. The book contains General Awareness questions from 12 sets of 2018 Papers and 8 sets of 2017 Paper. The book also contains 10 more solved papers from 2016 to 2007 (2 sets of 2014 Paper). Each set has 50 mcqs with detailed solutions provided at the end of each paper. The book would be useful for all the branches - Civil/ Mechanical/ Electrical.

High-dimensional probability offers insight into the behavior of random vectors, random matrices, random subspaces, and objects used to quantify uncertainty in high dimensions. Drawing on ideas from probability, analysis, and geometry, it lends itself to applications in mathematics, statistics, theoretical computer science, signal processing, optimization, and more. It is the first to integrate theory, key tools, and modern applications of high-dimensional probability. Concentration inequalities form the core, and it covers both classical results such as Hoeffding's and Chernoff's inequalities and modern developments such as the matrix Bernstein's inequality. It then introduces the powerful methods based on stochastic processes, including such tools as Slepian's, Sudakov's, and Dudley's inequalities, as well as generic chaining and bounds based on VC dimension. A broad range of illustrations is embedded throughout, including classical and modern results for covariance estimation, clustering, networks, semidefinite programming, coding, dimension reduction, matrix completion, machine learning, compressed sensing, and sparse regression.
