programming. An introduction to object-oriented design is also included. Part Two introduces GUI (Graphical User Interface) programming using Swing. Part Three explores key aspects of Java's API (Application Programming Interface) library, including the Collections Framework and the concurrency API. Herb Schildt has written many successful programming books in Java, C++, C, and C#. His books have sold more than three million copies. Dale Skrien is a professor at Colby College with degrees from the University of Illinois-Champaign, the University of Washington, and St. Olaf College. He's also authored two books and is very active in SIGCSE.

Taken over the period of a year in the doorway of the photographer's London studio, these portraits of models, most of whom are unknown, are at once profoundly moving and disquieting.

Whether you are a Java expert or at a beginner level, you'll benefit from this book, because it will teach you a brand new way of coding and thinking. The book starts with an explanation of what reactive programming is, why it is so appealing, and how we can integrate it in to Java. It continues by introducing the new Java 8 syntax features, such as lambdas and function references, and some functional programming basics. From this point on, the book focuses on RxJava in depth. It goes through creating Observables, transforming, filtering, and combining them, and concurrency and testing to finish with extending the library itself. This book is a definite tutorial in RxJava filled with a lot of well-described examples. It explains reactive programming concepts in plain and readable language, without scientific formulas and terms.

“ An intensely readable novel of the complexity of family ties . . . Dot Jackson is a true Southern voice, a master storyteller and an Appalachian treasure ” (Dori Sanders, author of *Clover and Her Own Place*). Early one morning in 1929, Mary Seneca Steele spontaneously packs a suitcase, gathers up her son and daughter, and steals away in

her abusive and dissolute husband ' s brand new Auburn Phaeton automobile leaving her privileged life in Charleston behind. It is the beginning of a journey of enlightenment that leads Mary “ Sen ” to the mountains and mysteries of Appalachia where she will learn unexpected family secrets, create a new life for herself and her children, and finally experience love and happiness before tragedy will once again test her. Written by an authentic Southern voice, Dot Jackson has spun a story that will captivate readers looking for an entertaining saga of self-discovery, family, love, loss and redemption. “ Refuge is a wonderful story about the need to find one ’ s place in the world—and the price paid to remain there. With her narrative gift and keen ear for Appalachian speech, Dot Jackson gives her readers a beautifully rendered portrait of a lost time and place. ” —Ron Rash, author of *Serena* and *The Cove*

Solomon/Martin/Martin/Berg, *BIOLOGY* is often described as the best majors text for *LEARNING* biology. Working like a built-in study guide, the superbly integrated, inquiry-based learning system guides you through every chapter. Key concepts appear clearly at the beginning of each chapter and learning objectives start each section. You can quickly check the key points at the end of each section before moving on to the next one. At the end of the chapter a specially focused summary provides further reinforcement of the learning objectives and you are given the opportunity to test your understanding of the material. The tenth edition offers expanded integration of the text's five guiding themes of biology (the evolution of life, the transmission of biological information, the flow of energy through living systems, interactions among biological systems, and the inter-relationship of structure and function).
