The Sugarcube is a neat little vinyl recording system, but in the end we were even more impressed by what it can do in real time, without hitting the red button.

This inexpensive owner's guide to fast, easy, do-it-yourself photocopier maintenance and repair requires no technical experience and is appropriate for all major photocopier makes and models. 160 illus. Otabind.

Design culture foregrounds the relationships between the domains of design practice, design production and everyday life. Unlike design history and design studies, it is primarily concerned with contemporary design objects and the networks between the multiple actors engaged in their shaping, functioning and reproduction. It acknowledges the rise of design as both a key component and a key challenge of the modern world. Featuring an impressive range of international case studies, Design Culture interrogates what this emergent discipline is, its methodologies, its scope and its relationships with other fields of study. The volume's interdisciplinary approach brings fresh thinking to this fast-evolving field of study.

Schools are complex social settings where students, teachers, administrators, and parents interact to shape a child ' s educational experience. Any effort to improve educational outcomes for America ' s children requires a dynamic understanding of the environments in which children learn. In The Social Organization of Schooling, editors Larry Hedges and Barbara Schneider assemble researchers from the fields of education, organizational theory, and sociology to provide a new framework for understanding and analyzing America ' s schools and the many challenges they face. The Social Organization of Schooling closely examines the varied components that make up a school ' s social environment. Contributors Adam Gamoran, Ramona Gunter, and Tona Williams focus on the social organization of teaching. Using intensive case studies, they show how positive professional relations among teachers contribute to greater collaboration, the dissemination of effective teaching practices, and ultimately, a better learning environment for children. Children learn more from better teachers, but those best equipped to teach often opt for professions with higher social stature, such as law or medicine. In his chapter, Robert Dreeben calls for the establishment of universal principles and practices to define good teaching, arguing that such standards are necessary to legitimize teaching as a high status profession. The Social Organization of Schooling also looks at how social norms in schools are shaped and reinforced by interactions among teachers and students. Sociologist Maureen Hallinan shows that students who are challenged intellectually and accepted socially are more likely to embrace school norms and accept responsibility for their own actions. Using classroom observations, surveys, and school records, Daniel McFarland finds that group-based classroom activities are effective tools in promoting both social and scholastic development in adolescents. The Social Organization of Schooling also addresses educational reforms and the way they affect a school ' s social structures. Examining how testing policies affect children ' s opportunities to learn, Chandra Muller and Kathryn Schiller find that policies which increased school accountability boosted student enrollment in math courses, reflecting a shift in the school culture towards higher standards. Employing a variety of analytical methods, The Social Organization of Schooling provides a sound understanding of the social mechanisms at work in our educational system. This important volume brings a fresh perspective to the many ongoing debates in education policy and is essential reading for anyone concerned with the future of America ' s children.

The three-volume set CCIS 923, CCIS 924, and CCIS 925 constitutes the thoroughly refereed proceedings of the First International Conference on Intelligent Manufacturing and Internet of Things, and of the 5th International Conference on Intelligent Computing for Sustainable Energy and Environment, ICSEE 2018, held in Chongqing, China, in September 2018.The 135 revised full papers presented were carefully reviewed and selected from over 385 submissions.The papers of this volume are organized in topical sections on: digital manufacturing; industrial product design; logistics, production and operation management; manufacturing material; manufacturing optimization; manufacturing process; mechanical transmission system; robotics.

John A. Walker Jr. was a Chief Warrant Officer and communications specialist for the US Navy. In 1985, he was arrested for selling classified secrets to the Soviet Union. Upon his arrest it was revealed that he had been acting as a spy from 1968 to 1985 and that his son, brother, ex-wife, and an acquaintance had also participated in the espionage ring. Altogether, their actions constituted one of the most serious security breaches in US history. In 1990, the New York Times stated, Mr. Walker provided enough code-data information to alter significantly the balance of power between Russia and the United States.What motivated a career naval officer to become a spy during the height of the Cold War? Over the years, statements by Walker have been reported in various books, newspapers, and other media outlets, but Walker has never told his own story-til now. Walker has decided to make public a private document that he originally wrote for his children to explain his actions. Among the reasons he gives for publishing this work is the following statement:As I grew older, I came to understand that the wars that had taken place during my entire life were just a symptom of a larger national policy. I watched my uncles and aunt go off to World War II, my brother to Korea, and myself to Vietnam, all of which were waged on foundations of lies. Voltaire said that history is a lie agreed upon by historians. How true I cannot classify myself as a visionary or idealist, but just a simple citizen who became angry by the government lies. I did conclude that the US system of government was broken, so I felt justified in breaking some rules in order to help save it... Why did I feel responsible or qualified to end the pattern of perpetual war? I cannot answer my own questions. But then, my insane stunt seemed to have worked. By the admission of both the US and the USSR, I provided the most extensive intelligence ever to the Soviets. With my material in hand, the Soviet government eventually realized the US planned no attack upon them, so my actions have contributed greatly to the Soviet Union's decision to end the Cold War.John A. Walker Jr. (Springfield, MO) is currently serving a life sentence for the crime of espionage at the US Medical Center for Federal Prisoners.
