It was the apex predator of all time, the most fearsome creature that ever lived -- a 70-foot, 70,000 pound Great White shark. Hundreds of 7-inch serrated teeth filled jaws that could swallow an elephant whole. It could sense its prey miles away, inhaling its scent as it registered the beat of its fluttering heart, and if you ever came close enough to see the monster...it was already too late. Eighteen years have passed since Jonas Taylor last crossed paths with carcharodon Megalodon. Now a middle-aged father of two, he is overwhelmed by mountains of bills and the daily strife of raising a family. But life is about to change. A Hollywood television producer wants Jonas to join his new survival series: Daredevils. For the next six weeks, two teams of crazy daredevils on a South Pacific Ocean voyage will try to outperform one another in front of the cameras. Jonas needs the money, and the job of doing the color commentary seems easy enough. But behind the scenes, someone else is pulling the strings. And before it's over, Jonas will again come face to face with the most dangerous creatures ever to stalk the Earth.

Seven years ago, and seven miles below the surface of the Pacific Ocean, Dr. Jonas Taylor encountered something that changed the course of his life. Once a Navy deep-sea submersible pilot, now a marine paleontologist, Taylor is convinced that a remnant population of Carcharodon megalodon prehistoric sharks growing up to 70 feet long, that subsisted on whales lurks at the bottom of the Mariana Trench. When offered the opportunity to return to those crushing depths in search of the Megs, Taylor leaps at the chance... but the quest for scientific knowledge (and personal vindication) becomes a desperate fight for survival, when the most vicious predator that the earth has ever known is freed to once-again hunt the surface.

New York Times bestselling author Steve Alten's Meg: Hell's Aquarium continues his thrilling action adventure series--the basis for the feature film The Meg, starring Jason Statham as Jonas Taylor. The most fearsome predators in history...are no longer history. The Philippine Sea Plate: The most unexplored realm on the planet. Hidden beneath its primordial crust lies the remains of the Panthalassa, an ocean that dates back 220 million years. Vast and isolated, the Panthalassa is inhabited by nightmarish sea creatures long believed extinct. Tanaka Institute, Monterey, CA: Four years have passed since Angel, the 76-foot, 100,000 pound Megalodon, birthed a litter of pups far too numerous and aggressive to keep in one pen. Fortunately, a Dubai royal prince who is building the largest aquarium in the world seeks to purchase two of the "runts"—if Jonas Taylor's twenty-one year-old son, David, will be their handler. Jonas reluctantly agrees, and David is off to Dubai for the summer of his life, not realizing that he is being set up to lead an expedition that will hunt down and capture the most dangerous creatures ever to inhabit the Earth! At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Master of suspense Steve Alten always takes readers to the edge with his non-stop, adrenaline-charged novels. Now, in The Trench, Alten shows just how deep fear can run when you don't know what lurks beneath the surface... Its appetite is ravenous. Its teeth, scalpel-sharp. For the first time, the captive twenty-ton Megalodon shark has tasted human blood, and it wants more... On the other side of the world, in the silent depths of the ocean, lies the Marianas Trench, where the Megalodon has spawned since the dawn of time. Paleobiologist Jonas Taylor once dared to enter this perilous cavern. He alone faced a Megalodon shark and cut its heart out. Now, as the body count rises and the horror of a monster's attack grips the California coast, Jonas must begin the hunt again, and return to the waking nightmare of... THE TRENCH "A fast-paced thriller with many plot twists." —Booklist "A nail-biting summer read." —Kirkus Reviews

In MEG: Generations, Steve Alten New York Times bestselling author continues his terrifying series. MEG: GENERATIONS opens where MEG: NIGHTSTALKERS left off. The Liopleurodon offspring has been moved to a holding tank aboard the Dubai-Land transport ship, Tonga for its journey to the Middle East. While the Crown Prince's investors gawk at the creature, below deck in the tanker's hold, another captured beast is awakened from its drug-induced state and goes on a rampage. The vessel sinks, the Lio escapes At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

In this fifth installment of the New York Times bestselling MEG series, Nighstalkers picks up where MEG: Hell's Aquarium left off. Bela and Lizzy, the dominant Megalodon siblings from Angel's brood, have escaped the Tanaka Institute to roam the Salish Sea in British Columbia. While Jonas Taylor and his friend Mac attempt to either recapture or kill the "sisters," Jonas's son, David, embarks on his own adventure, motivated by revenge. Having witnessed his girlfriend's gruesome death, David has joined a Dubai Prince's ocean expedition, tracking the 120-foot, hundred-ton Liopleurodon that escaped from the Panthalassa Sea. Haunted by night terrors, David repeatedly risks his life to lure the Lio and other prehistoric sea creatures into the fleet's nets, while battling his own suicidal demons. Steve Alten weaves these storylines together in a page-turning thriller that culminates in a final showdown between the most dangerous predators ever to inhabit the planet. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Marine biologist Zachary Wallace once suffered a near-drowning experience in legendary Loch Ness, and now, long-forgotten memories of that experience have begun haunting him. The truth surrounding these memories lies with Zachary's estranged father, Angus Wallace, a wily Highlander on trial for murder. Together the two plunge into a world where the legend of Loch Ness shows its true face. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Joining a scientific team originally scheduled to travel to one of Jupiter's moons, tech genius Robert Eisenbraun is put into hibernation against his will and awakens on a hostile Earth where he must defeat a technological adversary of his own making. By the best-selling author of the MEG series. 20,000 first printing.

Jonas Taylor returns in the latest entry in the bestselling MEG series. Having managed to contain the liopleurodon and captured the megalodon in the

Arabian Sea, Jonas soon discovers that there are even more creatures lurking in the deep waters of the world.

Kwan Wilson was a high school basketball star living in San Diego when a tragic accident changed his life in ways no one could predict. He only looked at his phone for a few seconds, but that was all the time it took to crash his car into a telephone pole, the impact killing his mother while severing his spinal cord and paralyzing him from the waist down. After the accident his father, Admiral Douglas Wilson, sends him away to live with his maternal grandmother in South Florida. Kwan's new principal, anticipating his depression and isolation, tells him about an internship working at a genetics lab in Miami that's testing shark stem cells on rats in an effort to cure cancer and repair spinal injuries. Kwan declines—until he learns the beautiful Anya Patel is an intern at the lab. The good news is that the stem cells are curing their rat subjects; the bad news is it alters their DNA so much it kills them. When a promising breakthrough is made, Kwan risks his life and injects himself with the experimental stem cells—altering his destiny and the lives of millions in the process.
