In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

*Understanding Health Insurance: A Guide to Billing and Reimbursement, 8th Edition* is a comprehensive source for teaching the subject of health insurance and reimbursement. The book contains chapters on introductory information on the health insurance field, managed health care, legal and regulatory issues, coding systems, reimbursement methodologies, coding for medical necessity, and common health insurance plans. Each chapter contains exercises to illustrate content and reinforce learning. Numerous opportunities are provided throughout the book for manual completion of CMS-1500 claims. A CD-ROM at the back of the book allows for electronic data entry of CMS-1500 claim form information. End of chapter review questions in objective format (e.g., multiple choice) test learners on their understanding of book content. Appendices I and II provide case studies that are also included on the Student Practice CD-ROM. Additional appendices provide instruction in dental claims processing and completion of the UB-92 (claim used for inpatient and outpatient hospital claims). The accompanying workbook provides application based assignments for each chapter, additional content review (multiple choice questions), and additional case studies for practice in completing CMS-1500 claims. This edition of the book contains the most up to date information regarding health insurance claims processing and coding and reimbursement issues.
