The shortest route to mastering verb conjugations One of the greatest challenges in learning a language is mastering verb conjugations. The books in the unique Language Verb Drill series make it easier than ever for learners to meet that challenge. Drilling, whether it's for learning a musical instrument, a sport, or a language, is an essential part of a sound education because repeated, concentrated practice makes specialized skills become second nature. Unlike most verb books, which tend to concentrate on tables of conjugations, the books in the Language Verb Drills series allow students to focus exclusively on building mastery of verbs without being distracted by other elements of grammar. Combining the features of a workbook and reference manual, they clearly and systematically explain how a verb system works while providing numerous drills for practice. These revised editions of the popular study guides now include a final review section to reinforce the reader's ability to automatically select the correct verb form.

Alors que la majorité des innovations en didactique des langues se manifeste dans la création de nouveaux outils pour l'enseignement, le projet "Médiation culturelle et didactique des langues" a choisi une autre voie, en adoptant une démarche de formation à la recherche par la recherche. C'est dire qu'il a tenté de résoudre plusieurs défis : vivre la pluralité des cultures de formation des enseignants comme une source d'innovation, plutôt que comme un obstacle ; adopter un cadre pluridisciplinaire, introduisant des références en usage dans les sciences sociales pour développer une réflexion sur le rôle des langues dans la cohésion sociale ; apporter un faisceau de réponses à une question jusqu'à maintenant peu présente dans le champ de la didactique des langues et des cultures "Quelle est la place de la médiation culturelle ?" (4e de couv.).

Methods to contextualize tests in the four skill areas of listening, reading, writing, and speech are described. The roles of grammatical and lexical cues, recording semantic details, cloze adaptation, comprehensive questions, logical continuation items, global classification, and sociolinguistic factors are examined in relation to test formats. Various levels of grammatical and lexical specificity are illustrated and mixed skill items are discussed. Ideas for oral proficiency testing including interviews based on the ACTFL/ETS Rating Scales are provided. Following the description of item types, concrete suggestions for creating tests are offered. It is noted that because the contextualized tests integrated many linguistic and lexical features in a few well chosen contexts, the creation of the test is simpler than when instruction contains unrelated items. Several examples of hour-long unit exams for college French and Spanish courses are presented. (RW)
