From John Locke to Sigmund Freud, philosophers and psychologists have long believed that we begin life as blank moral slates. Many of us take for granted that babies are born selfish and that it is the role of society—and especially parents—to

from little

sociopaths into

civilized beings. In

Just Babies, Paul

Bloom argues that

humans are in fact

hardwired with a

sense of morality.

Drawing on

groundbreaking

research at Yale,

Bloom

demonstrates that,

even before they can speak or walk, babies judge the goodness and badness of others' actions; feel empathy and compassion; act to soothe those in distress; and have a rudimentary sense of justice. Still, this innate morality is limited, sometimes

tragically. We are naturally hostile to strangers, prone to parochialism and bigotry. Bringing together insights from psychology, behavioral economics, evolutionary biology, and philosophy, Bloom explores how we have come to

surpass these
limitations. Along
the way, he
examines the
morality of
chimpanzees,
violent
psychopaths,
religious
extremists, and Ivy

and explores our
often puzzling moral
feelings about sex,

politics, religion, and race. In his analysis of the morality of children and adults, Bloom rejects the fashionable view that our moral decisions are driven mainly by gut feelings and unconscious biases. Just as reason has driven our great

argues, it is reason
and deliberation

that makes possible
our moral

discoveries, such as

and Louis C.K.

Vivid, witty, and

probing, *Just Babies*
offers a radical new
perspective on our
moral lives.

When does our
acknowledgment of
the social contract
really begin? When
do young children

File Type PDF

first display an

understanding of
their social world?

When and why do

they begin to grasp

that other people

have feelings and

In this pathbreaking

work Judy Dunn

explores several

aspects of the early

process of social

children's
recognition of the
feelings of others,
their ability to
interpret and
anticipate the
behavior and
relationships of
others, and their
comprehension of
the prohibitions and
accepted practices
of their world.

File Type PDF

Dunn's work brings into focus an apparent paradox in our current view of the very young child's social understanding.

Whereas research on infancy reveals that babies are born with a predisposition to learn about other people, and appear
