A different but complementary way of viewing an argument is to treat it as a particular use of language: Presenting arguments is one of the important things we do with words. This approach stresses that arguing is a linguistic activity. Instead of studying arguments as abstract patterns, it examines them as they occur in concrete settings.

Understanding Arguments an Introduction to Informal Logic ...

Traditionally, logic has been considered the most general science dealing with arguments. The task of logic is to discover the fundamental principles for distinguishing good arguments from bad ones. For certain purposes, arguments are best studied as abstract patterns of reasoning. Logic can then focus on these general forms rather than on particular arguments, such as your attempt to prove to ...
